

# CAASP

Collaborative Acute Aortic Syndrome Project

***A collaborative multicentre audit to understand current acute aortic syndrome (AAS) diagnostic pathways***

**Prompt diagnosis and management key in AAS**

**Include all adults with AAS:**

- Aortic dissection (AD)
- Penetrating aortic ulcer (PAU)
- Intramural haematoma (IMH)

**Imaging (CT/MRI/US) diagnosis**

**Retrospective review Jan 2018-June 2021**

**Multicentre audit open to UK centres**

***Primary objective:*** outline diagnostic and management pathways for AAS and facilitate improvements

***Secondary objectives:*** mortality, complications, intervention and re-intervention rates. Specialist vs non specialist centre outcomes. Geographical & socioeconomic variation.

**6 month follow up**

**Register interest now using QR code**

**Audit opens 4th April 2022**

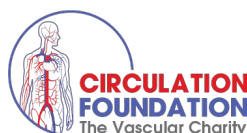

**Centre specific data for local presentation**

**Collaborative authorship for all participants**
